

Sysmex Europe and Inpeco launch the next gamechanger in urinalysis

Norderstedt, Germany, 20 October 2021 – Free your hands with the UN-Series connection to FlexLab™ Total Lab Automation. The collaboration between us and Inpeco takes advantage of our UN-Series urinalysis solutions and Inpeco's FlexLab™ track, together making the next step towards a fully automated urinalysis workflow solution of the highest level.

The unique part of this solution is that it is the first and only bi-directional system that transports racks between the Sysmex UN-Series urinalysis analysers and Inpeco's TLA system. With this connection, we leverage Sysmex Europe's superior automation capabilities for the urinalysis workflow and offer more flexibility than ever before. The interface is available for the core lab and microbiology lab and provides customers with maximum flexibility to set up the workflow according to their needs.

Similar to the UN-Series, Inpeco's FlexLab™ Total Laboratory Automation system grows with the changing needs of the customer. Adding modules or new analyser connections is easy by design, making it a future proof investment. Moreover, FlexLab™ is the only truly open automation system, allowing laboratories to connect the analysers of their choice and the specialties they need to optimally support their workflows and drive premium quality patient care.

This isn't the first collaboration between Sysmex Europe and Inpeco. Connections for our haematology and haemostasis analysers have been on the market for quite some time, with our first solution collaboration dating back to 2010.

About Sysmex Europe GmbH

Sysmex supports healthcare professionals around the world in lighting the way with diagnostics by providing a broad range of medical diagnostics products and solutions. In the fields of haematology, urinalysis, haemostasis, life science, flow cytometry and essential healthcare, we combine highly dependable, multi-functional and easy-to-operate instruments, a variety of reagents and software, plus reliable service and support.

Sysmex Europe GmbH, located near Hamburg, Germany, is a subsidiary of the Sysmex Corporation from Kobe, Japan. From our Hamburg offices, we serve our affiliates, distributors and customers throughout Europe, the Middle East, and Africa (EMEA). For more information on how we are lighting the way with diagnostics, visit www.sysmex-europe.com/

About Inpeco

Inpeco is the global leader in Total Laboratory Automation. The company's game-changing solutions combine open connectivity with full sample traceability to deliver secure test results and increased productivity to clinical laboratories around the world. To date, more than 2300 Inpeco systems have been shipped to over 70 countries. The Group is headquartered in Novazzano, Switzerland, and operates a manufacturing plant in the Piedmont region, Italy.
