To register for the symposium and book a hotel room, etc., please contact your local Sysmex representative.

We are really looking forward to another great Symposium and bringing together an amazing amount of expertise and experience from around the Europe, Middle East and Africa region. We know you will be impressed and that you will benefit hugely from the knowledge and networking. See you in September!

The International Convention Center Ghent is not far from the city centre and within easy reach of numerous hotels. Ghent is the capital and largest city in East Flanders and well known for its medieval architecture. As a university city, it has numerous research-oriented companies. Belgian cuisine and beverages are perhaps one of the best-kept secrets in Europe, so there will be much to enjoy on a social front, too.

Sysmex is a knowledge leader in its fields of expertise, and no Sysmex Symposium is complete without a poster session highlighting the development of knowledge around our region and beyond.

We would therefore like to invite you to display your latest research results during our poster session. Topics should be related to haematology, haemostasis, urinalysis and/or laboratory medicine.

If you are interested, please submit your abstract by 16 June 2017 to your local Sysmex representative who will forward your application.

Your abstract should include the following information:
> Title
> Author name(s)
> Author affiliation(s)
> Objectives
> Results
> Conclusion

The abstract should be restricted to a maximum of 250 words for the body text (including objectives, results, conclusion). Poster size should not exceed DIN A0 (841×1189 mm) portrait format. The language is English.

The owners of the best posters (max. 4) will be rewarded with a presentation on Wednesday afternoon.
‘Stay ahead with Sysmex’
at our 2017 Scientific Symposium

We are delighted to invite you to Sysmex’s 7th European Scientific Symposium to be held in the beautiful city of Ghent, Belgium, from 12–14 September 2017.

Like our last symposium in Lyon, it promises to be an exciting and especially informative event. For three days you can look forward to lively discussions on the latest developments in our fields of expertise and so take away valuable insights and new knowledge that you can apply in your daily work.

Sysmex is all about Shaping the Advancement of Healthcare. By solving the challenges you face in your work, we help you stay ahead, of your competition, and in terms of the latest scientific developments.

So what is the focus this year? Much has happened in many areas at Sysmex since our last Symposium. We continue to develop our flow cytometry expertise and have just launched over 1000 antibodies for research purposes and upgraded analysers, and have launched a genuinely unique series of analysers in urinalysis. We have made an especially significant advance in haematology, where we provide more clinical value and workflow advances than ever before. You will simply have to attend to discover what it all means to you.

FOCUS 2017

TUESDAY, 12 SEPTEMBER 2017
9:00 Registration desk open
11:30 Arrival, registration and buffet lunch
